Lane A · Platform, Look and Flat Spaces

Build the shared look shader and the SpaceLab host

Implement the flat and 4D spaces

Hold the frame rate: thermal ladder, performance runs and soak

Get the app running in stereo on both phones

Lane B · Kernel and Curved Worlds

Implement Small Planet and Aligned Cells

Put the scanned room into the curved world

Implement the geometry kernel and the curved-walk rig

Implement hyperbolic terrain generation

Lane C · Scan, Room and Safety

Bring up AR tracking, input and the pose pipeline

Implement room scanning and the RoomModel

Rebuild the room as Home and add Bump Guard

Build onboarding and the pre-scan path

Lane D · Link, Station and Forge

Build live tuning, the operator Console and telemetry

Build the phone-to-Station link

Build the Spectator mirror and the flat-twin map

Build the Forge: object photos to furniture meshes

Set-up, in parallel

Contract pages, in parallel
